PRODUCT INFORMATION

DESIGN WA202 RECEIVER

The WA202 possesses outstanding transparency and openness for such a relatively inexpensive device.

YBA's WA202 receiver is noteworthy for its temporal acuity, excellent timing and speed, and austere – clean but not clinical – tonality and forthright but unexaggerated dynamics. Put together this is a great recipe for an exuberantly music presentation. Factor in decent build and a fine feature count, and it's a charmer.

Hi Fi Choice UK

With its distinctive styling, Design products are not the usual standard 430 mm width, but rather a highly attractive 320mm. The amplifier does not have the accepted 'standard' four feet, but is supported by extensions of the casework giving three pointed support.

The WA202 has four push button fascia controls and operate differently when the tuner is selected. Controls include source, function, volume down and volume up. At the far left hand side is the power on/off. The receiver also comes with a most attractive remote control handset.

It has five sets of RCA connections on the rear panel, which include a pre-out for those people who may like to connect a separate power amplifier, powered speakers or subwoofer. There is a USB connection for iPod charging together with an IR in and out capability to link Design products one to the other.

The RDS tuner section provides the capability to store 40 FM preset stations plus a further 40 AM preset stations. The front panel function switch is used with the tuner cycling through the available options. When using the tuner, the volume - and volume + buttons control the selection of stored stations, or alternatively, the navigation of stations when preset stations are not in use.

AUDIO OUTPUTS	1 pair speaker outputs 1 Pre-out (RCA)
POWER OUTPUT (8 OHMS)	50W per channel
SNR	>90dB
FREQUENCY RESPONSE	20Hz - 20kHz
THD+N	<0.01%
INPUTS	4 Prs RCA
TUNER BANDS	FM AM
TUNER PRESETS	40 FM 40 AM
USB POWER SUPPLY	Type B, 5V, 600 mA maximum
POWER SUPPLY	Linear power supply with high performance EI type transformer 160 VA
CUSTOM INSTALLATION	IR in IR out
CONSTRUCTION	Single frame aluminium
DIMENSIONS	320 x 280 x110
WEIGHT	10 kg
COLOUR	Black
