How to update:

Over-the-Air firmware update

1. Make sure your R100 is connected to a Wi-Fi network with access to internet.

2. Go to "Settings" - "Firmware Update".

3. Click on "Online Update" and wait for system to detect the new firmware.

4. Confirm and wait until firmware is downloaded and fully installed.

5. Go to System settings – Factory Data Reset and click on "Erase Everything" to perform full factory reset of the device.

Manual Update

1. Download firmware file from Google Drive

2. Copy downloaded .zip file onto a USB drive and insert it into USB1 or USB2 input. *(Do not unpack/open the .zip file)*

3. Go to "Settings" - "Firmware Update" and click on "Local Update".

4. Locate the update .zip file on the USB Drive.

5. Confirm install and wait until R100 updates and restarts itself.

6. Go to System settings – Factory Data Reset and click on "Erase Everything" to perform full factory reset of the device.
